

VCU Parkinson's & Movement Disorders Center

(804) 360-4669

The VCU Parkinson's and Movement Disorders Center is building an interdisciplinary evaluation and clinical care program addressing the needs of individuals and families affected by movement disorders. Our specialists assess both motor and non-motor symptoms, and work together to integrate outstanding clinical care with clinical research.

We are available to treat the full spectrum of movement disorders including:

- ◆Ataxia ◆Blepharospasm ◆Bradykinesia ◆Cervical Dystonia/Spasmodic Torticollis
- ◆Corticobasal Degeneration ◆Dyskinesias ◆Essential Tremor
- ◆Hemifacial spasms ◆Huntington Disease ◆Multiple System Atrophy
- ◆Parkinson Disease ◆Wilson Disease ◆Progressive Supranuclear Palsy
- ◆Tardive Dyskinesia/Dystonia ◆Tics ◆Tremor

Our movement disorders neurologists provide:

- Initial evaluation and diagnosis, review of treatment options, and coordinate individualized care plan including consults provided by other team members as below.
 - Physical therapist – conditioning, balance, coordination and motor skills
 - Neuropsychologists – thinking skills, such as attention, memory, and problem solving
 - Geriatric psychiatry – evaluation of psychiatric symptoms in movement disorders and pre-symptomatic Huntington Disease genetic counseling
 - Neurosurgery – assessment for deep brain stimulation, pre- and post-operative care
